AMENDMENTS TO THE CLAIMS:

This listing of claims will replace all prior versions, and listings, of claims in the application:

LISTING OF CLAIMS:

Claims 1-16 canceled.

Please enter the following new claims.

- 17. A packaging material consisting of three plastic layers, two outer layers and one intermediate layer;
 - a. the intermediate layer comprising about 0.04 to about 1 weight
 % carbon black, and about 3 to about 80 weight % light-reflecting mineral particles;
 - the plastic of the two outer layers being the same as the plastic
 of the intermediate layer; and

wherein the packaging material prevents the transmission of ultra-violet light.

- 18. The packaging material of claim 17, wherein the plastic is a polyolefin.
- 19. The packaging material of claim 17, wherein the plastic is a high density polyethylene or a copolymer of ethylene and propylene with a melt index between 0.5 and 5 according to American Society for Testing and Materials (2.16 kg; 230°C).

- Page 3
- 20. The packaging material of claim 17, wherein the light-reflecting material is selected from the group consisting of: montmorillonite, dolomite, calcium carbonate, talcum, mica, volastonite, and clay.
- 21. The packaging material of claim 17, wherein an outer plastic layer includes a white pigment or colouring agent concealing the intermediate layer.
- 22. A package for light-sensitive food products consisting of three plastic layers,

two outer layers and an intermediate layer;

wherein the outer layers are made of the same plastic, and at least one of the outer layers comprises about 5 weight % or less white pigment; the intermediate layer is made of the same plastic as the outer layers, and comprises about 0.04 to about 1.0 weight % light-absorbing material, and about 3 to about 80 weight % light-reflecting material; and wherein the package has a white appearance and prevents the transmission of ultra-violet light.

- 23. The package of claim 22 wherein the light-absorbing material is carbon black; and the light-reflecting material is selected from the group consisting of: montmorillonite, dolomite, calcium carbonate, talcum, mica, volastonite, and clay.
- 24. The package of claim 22, wherein the intermediate layer comprises about 65% by weight of the light-reflecting material.

- 25. The package of claim 22, wherein the white pigment is titanium dioxide.
- 26. The package of claim 22, wherein the intermediate layer further comprises a white pigment.
- 27. A packaging material consisting of a plurality of plastic layers, wherein:
 - a. a layer comprises about 0.04 to about 1 weight % carbon black,
 and about 3 to about 80 weight % light-reflecting mineral
 particles; and
 - b. all of the plastic layers are made of the same plastic; and wherein the packaging material prevents the transmission of ultra-violet light.
- 28. The packaging material of claim 27, wherein the plastic is a polyolefin.
- 29. The packaging material of claim 27, wherein the plastic is a high density polyethylene or a copolymer of ethylene and propylene with a melt index between 0.5 and 5 according to American Society for Testing and Materials (2.16 kg; 230°C).
- 30. The packaging material of claim 27, wherein the light-reflecting material is selected from the group consisting of: montmorillonite, dolomite, calcium carbonate, talcum, mica, volastonite, and clay.
- 31. The packaging material of claim 27, wherein a plastic layer includes a white pigment or colouring agent to impart a white appearance to the material.
